

Arrows (antiparallel) – Sam Hesp

Notes:

- 34 x 54 grid (consider cutting two units off 36 divisions)

My process:

1. Fold the level shifter beneath the arrowhead
2. Fold the level shifters at the base of the arrow
3. Pull the trapped paper from behind to lock the layers at the base
4. Collapse the arrowhead
5. Work in a zig-zag pattern from left to right, in the direction of the arrows
6. Reorder the layers as required
7. Fold behind the corners of the pleats to lock
