

Dragon Fruit Cutting (with thorns) – Sam Hesp*

*The thorns are a slightly modified version of those on Robert Lang's cactus (<https://langorigami.com/crease-pattern/cactus-opus-680/>), the difference being that the bottom layer of paper surrounding each set of thorns is unsunk. This makes the pleats invisible except for a thin line. The crease pattern for this design is uploaded with the permission of Robert Lang:

Notes:

- 50 x 27 grid
- After collapsing the thorns, follow the crease pattern for “Dragon Fruit Cutting (without thorns)”, noting that the slanted creases must be made a slightly different angle to make room for the thorns (compare with above).
